Amman, Jordan | 0780792858 | ammalnaser02@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Information Systems fresh graduate focused on frontend development, UI/UX design, and practical web application development, with hands-on experience in React, HTML, CSS, JavaScript, Java, PHP basics, NoSQL databases, Firebase, Supabase, GitHub, and Netlify. Background includes customer support operations, manual QA training, requirements analysis, technical documentation, and building user-centered projects such as service portals, healthcare systems, mobile app concepts, and digital platforms. Interested in roles where design, development, problem-solving, and real user needs meet through clear, practical digital solutions.

EDUCATION

Bachelor's degree in computer information systems	2021 - 2026
University of Jordan, Amman, Jordan GPA: Good	

WORK EXPERIENCE

Customer Support Representative / AMR Support

Extensya, Amman, Jordan | August 2025 - Present

- Handle customer inquiries and service-related requests through professional written and verbal communication while following structured workflows.
- Use internal systems to manage cases, follow-ups, customer information, and service procedures accurately.
- Document issues, verify details, and review case requirements with strong attention to detail.
- Develop practical understanding of support operations, service logic, user needs, and workflow improvement opportunities.
- Apply time management, adaptability, teamwork, and problem-solving skills in a fast-paced customer support environment.

TRAINING EXPERIENCE

Manual QA Trainee

Estarta, Jordan

- Completed hands-on training in manual software testing and Quality Assurance practices.
- Created test plans, test cases, bug reports, requirement traceability matrices, and test summary reports.
- Practiced requirements review, test design, test execution, defect reporting, and test documentation.
- Used Jira, Postman, Selenium IDE, JMeter, and OWASP ZAP during QA learning and practice.

SELECTED PROJECTS

Customer Support Service Portal

Personal Project | HTML, CSS, JavaScript, Supabase, NoSQL/Database Integration, Netlify, GitHub

- Built a web-based service knowledge portal to help support agents access service details, pricing structures, notes, eligibility rules, and department-specific guidance.
- Developed reusable frontend components including sidebar navigation, collapsible sections, search, notes, notifications, and admin-managed content.
- Integrated database-backed content management for service sections, price rows, eligibility rules, notes, deleted items, and dynamic page content.
- Created an admin interface for editing content, managing price rows, restoring deleted data, publishing updates, and adding admin-only authorization logic.

- Applied QA practices by testing page behavior, validating migrations, debugging JavaScript issues, and checking user workflows.

CanCare

Graduation Project | React, Firebase, Web Admin Planning, Mobile App Concept, UI/UX, Requirements Analysis

- Designed a cancer patient management assistant app focused on treatment organization, appointments, medication management, reminders, publications, and community support.
- Developed and planned the web/admin side with role-based workflows for patients, doctors, nurses, and admins.
- Defined functional requirements for appointment slots, medication workflows, reminder notifications, and doctor/nurse permissions.
- Planned accessibility-focused UI choices including soft dark mode colors and gentle contrast suitable for cancer patients.

SAIR - Smart Accident Information Reporting System

Competition Project | Website, Mobile App Concept, UI/UX, Digital Transformation

- Developed the website side and contributed to the mobile application concept for reporting minor car accidents through digital evidence and remote validation.
- Planned features such as GPS-based accident location, document scanning, photo/video evidence, digital signatures, timestamps, and fraud-prevention considerations.
- Designed a police-side dashboard concept with incident map view, report prioritization, nearest patrol routing, and risky-location analytics.

TECHNICAL SKILLS

Frontend & Web: HTML, CSS, JavaScript, React, Bootstrap, Responsive Web Design

Programming & App Basics: Java, PHP Basics, Mobile App Development Fundamentals, Game Development Basics

Databases & Backend Basics: Firebase, Supabase, NoSQL Databases, Database-Backed Content Management

UI/UX & Design: Figma, Canva, User Flows, Wireframes, Bilingual Interface Planning, RTL/LTR Considerations

QA & Testing: Manual Testing, Test Case Design, Bug Reporting, Test Plans, RTM, SDLC, STLC, Jira, Postman, Selenium IDE, JMeter, OWASP ZAP

Tools & Platforms: GitHub, Netlify, Unity, Blender, Microsoft Office

Documentation & Analysis: Requirements Analysis, Functional Requirements, Technical Writing, Service Documentation, Workflow Analysis

Professional Skills: Communication, Problem Solving, Attention to Detail, Time Management, Teamwork, Adaptability, Customer Handling, Project-Oriented Work

CERTIFICATES & COURSES

- Manual QA Training, Estarta
- Cloud Computing Certificate, Amazon Web Services / AWS
- Quality Assurance Training
- Fundamentals Training
- C1 English proficiency certificate

LANGUAGES

Arabic: Native | English: Advanced / Professional Working Proficiency (C1)
